

## Recommendation Letter for Chrysostomos Koumides

**Date:** January 27, 2025

**From:**

Manos Tsardoulas  
Cyber Physical Systems Researcher  
School of Electrical and Computer Engineering  
Aristotle University of Thessaloniki, Greece

---

**Subject:** Chrysostomos Koumides Testimonial

Chrysostomos has worked on a quite complex subject in his master thesis, for which I was a co-supervisor. He has created a Domain Specific Language (DSL) called **BlendDSL**, which enables automated transition between textual and graphical views of other DSLs to assist DSL developers in enhancing their model creation process. His work was **deemed as perfect** if one considers that it included low/no code software engineering concepts, **full stack development**, and increased requirements of abstract thinking, as he meta-modeled a modeling procedure! Excellent work Chrysostomos, and I wish you good luck with your future endeavors :)
