PROJECTS

YelpCamp | HTML, CSS, JS, NODE, MongoDB, EXPRESS, Heroku
- I create a full functional campground renting website.
- With the help of the Colt Steele, I create the skin and bones of the website with HTML, CSS, and Bootstrap. Then we add the back-end features of the server communication, authentication, authorization, security, content upload using JS, JSON, Node, Express, MongoDB. (Dynamic Structure – EJS, Dynamic Map - Mapbox)

WEBSITE AEGENCY | HTML, CSS, JAVASCRIPT, BOOTSTRAP, FIGMA
- I design a mockup and create a custom website for a website agency.
- With a Team of me and a colleague we first create the mockup based on the requirements in Figma. Then using Bootstrap, HTML, CSS we create the structure and aesthetic of the website and animations/functionalities with JavaScript.
